Science- What is it made of?

Lesson two:

1. Discuss how last week you went for a walk and created a map. What were some of the things you saw on your walk? What did they look like? How did they feel?
2. Introduce the word "object". Explain that the word object is used instead of using the word "things".
3. Look at different objects you can find in the house/classroom. Students describe the different objects they have found. For example,
   - What is the object? Eg, a wooden block
   - What is the object made of? Eg wood
   - Can you describe the object? Eg brown and small
   - Can you describe the material that object is made of? Eg, hard, smooth, heavy
   - Can you find another material that is the same?
4. Students complete "tell me about it" worksheet based on one object they have found around the house.

Science- What is it made of?

Lesson three:

Discuss words that you used last week to describe objects.

Game time!

Player 1: Student

Player 2: Adult or sibling

Student finds an object around the house/classroom and has to describe it to someone at home.

Player 1: finds an object.
Player 2: wears a blindfold or covers eyes.
Player 1: describes the object they have found. Eg how it feels, what shape the object is, what material it might be made of, how you can use the object.
Player 2: has to guess the object.
Now swap! Player 2 now needs to find the object and player 1 has to guess what it is.

Play as many time as you would like.

Make a list on your sheet of all the words that you used to describe the objects around the house.

What's it made of?

Record all the words you used to describe objects you found around the house.
